The equipment behind our precision, safety, and results

Behind every result at Sculpt Aesthetics is advanced, well-maintained technology, chosen to improve precision, safety, and comfort across our surgical and non-surgical treatments. At Sculpt Aesthetics in Madhapur, Hyderabad, Advanced Technology & Machines is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Advanced Technology & Machines

This page introduces the core technologies used across our procedures — from ultrasound-assisted liposuction devices to non-invasive muscle and skin-tightening machines — so you understand what's actually being used during your treatment.

Many people considering Advanced Technology & Machines have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Patients curious about the specific technology used in their planned procedure
- Those comparing clinics based on equipment and technique

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Advanced Technology & Machines Works: Step by Step

Step 1: Consultation & Assessment

Your doctor reviews your health history, goals, and suitability for Advanced Technology & Machines.

Step 2: Personalized Plan

A plan and, where relevant, a session or monitoring schedule is created to match your specific needs and safety profile.

Step 3: The Treatment

Advanced Technology & Machines is carried out under professional supervision in a comfortable clinical setting.

Step 4: Ongoing Monitoring

Your progress is tracked over follow-ups, with your plan adjusted as needed.

Our Approach

Lipo Vase (Ultrasound-Assisted Liposuction): Uses focused ultrasound energy to gently liquefy fat before removal, allowing smoother extraction, especially in fibrous areas like the male chest or back.

Vibra Sculpt (Power-Assisted Liposuction): Uses rapid, gentle mechanical vibration on the liposuction cannula to loosen fat more efficiently, reducing physical strain on tissue and often speeding up recovery.

EMS Sculpt: A non-invasive electromagnetic muscle stimulation technology used to tone and strengthen target muscle areas without surgery — see our dedicated EMS Sculpt page for details.

InMode RF & Embrace RF: Radiofrequency-based technologies used for non-surgical skin tightening and body contouring, stimulating collagen production to improve skin laxity and texture.

Kegel Chair: A non-invasive, electromagnetic pelvic floor stimulation device used to support pelvic floor strengthening — often relevant

alongside intimate aesthetic procedures or postpartum recovery.

Benefits

Here's what patients typically gain from Advanced Technology & Machines:

✓ Greater surgical precision ✓ Reduced tissue trauma and often faster recovery ✓ Non-surgical options for muscle toning and skin tightening ✓ Consistent, internationally recognized safety standards

Recovery Timeline

Recovery looks a little different for everyone, but here's a general idea of what to expect:

Recovery expectations depend on which technology is used as part of your specific treatment; your surgeon will explain this during your consultation.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

Pricing

The cost of Advanced Technology & Machines depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Safety & Things to Consider

All technology and equipment at Sculpt Aesthetics is maintained and operated according to international safety standards by trained professionals. Your surgeon will always explain which specific technology is being used in your procedure and why.

Frequently Asked Questions

Will my surgeon tell me which technology is used in my procedure? Yes, your surgeon will explain the specific technique and technology recommended for your case and why it's the best fit.

Are these technologies safe? All equipment used at Sculpt Aesthetics is maintained to international safety standards and operated by trained professionals.

Is this treatment right for everyone? Suitability depends on individual health and goals; a proper consultation and assessment is needed before starting.

How long before I see results? This depends on the treatment and individual factors; your provider will give you a realistic timeline during consultation.

Does using advanced technology cost more? Some advanced techniques may affect overall pricing depending on the procedure; this will be discussed transparently during your consultation.
