## Safe, precise removal of benign breast lumps

---

A fibroadenoma is a common benign breast lump. Depending on its size, symptoms, and growth pattern, surgical removal may be recommended following proper diagnosis. At Sculpt Aesthetics in Madhapur, Hyderabad, Breast Fibroadenoma Removal is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

# Understanding Breast Fibroadenoma Removal

---

Fibroadenomas are non-cancerous, solid breast lumps made of glandular and connective tissue. They are common, especially in younger women, and while generally harmless, evaluation is important to confirm diagnosis and guide management.

Many people considering Breast Fibroadenoma Removal have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

## Signs You May Be a Good Candidate

---

You might be a good fit for this treatment if any of the following sound familiar:

- Women with a diagnosed fibroadenoma that is enlarging or symptomatic
- Patients seeking removal for reassurance or comfort
- Those advised excision following imaging and clinical evaluation

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

## How Breast Fibroadenoma Removal Works: Step by Step

---

### Step 1: Consultation & Evaluation

You'll meet with your surgeon to discuss your goals, medical history, and

concerns. This is the time to ask questions and understand whether Breast Fibroadenoma Removal is right for you.

## **Step 2: Personalized Planning**

Your surgeon examines your body structure and designs a plan for Breast Fibroadenoma Removal that fits your anatomy, so results look natural and balanced.

## **Step 3: The Procedure**

Breast Fibroadenoma Removal is performed in a modern, sterile operation theatre under appropriate anesthesia, following strict safety protocols throughout.

## **Step 4: Recovery & Follow-Up**

You're monitored closely after the procedure, with clear aftercare instructions and scheduled follow-up visits to track healing and results.

## **Our Approach**

After clinical examination and imaging, the lump is surgically excised through a small, carefully placed incision designed to minimize scarring while preserving normal breast contour.

## **Benefits**

---

Here's what patients typically gain from Breast Fibroadenoma Removal:

✓ Removal of the lump for peace of mind ✓ Minimal scarring with precise technique ✓ Quick, straightforward outpatient procedure

---

# Recovery Timeline

---

**Recovery looks a little different for everyone, but here's a general idea of what to expect:**

This is typically a minor outpatient procedure with most patients resuming normal activity within a few days.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

## Pricing

---

The cost of Breast Fibroadenoma Removal depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

## Scars & Marks

---

Incisions are small and placed to follow natural skin lines where possible, minimizing visible scarring.

## Safety & Things to Consider

---

Like any surgical procedure, this treatment carries general surgical risks, which your surgeon will explain in detail during consultation. At Sculpt Aesthetics, we follow international safety standards, strict infection-control protocols, and modern operation theatre facilities to keep every

procedure as safe as possible. A thorough medical evaluation before surgery helps make sure the procedure is right for you.

## Frequently Asked Questions

---

**Is fibroadenoma cancer?** Most fibroadenomas are benign, but proper evaluation is important to confirm diagnosis.

**Does the fibroadenoma always need to be removed?** Not always — your surgeon will advise based on size, symptoms, and growth pattern.

**Is the procedure painful?** Most patients feel minimal discomfort during Breast Fibroadenoma Removal itself, since it is performed under anesthesia. Some soreness in the days after is normal and manageable with prescribed medication.

**How long does the surgery take?** This depends on the extent of the procedure and will be explained clearly during your consultation, once your specific plan is finalized.

**When will I see the final results?** You'll notice initial changes as swelling reduces over the first few weeks, with final results becoming clearer over the following months.

**Do all fibroadenomas need to be removed?** Not necessarily — small, stable, and clearly benign fibroadenomas are sometimes simply monitored; your surgeon will guide you based on imaging and clinical findings.

**Will removal affect breastfeeding later?** Careful surgical planning aims to minimize any impact on future breastfeeding ability; this is discussed during consultation.
