Understanding Dermal Fillers

Dermal fillers are injectable gels, most commonly hyaluronic acid-based, used to add volume, smooth lines, and enhance contours in areas such as the cheeks, lips, and jawline.

Many people considering Dermal Fillers have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals with volume loss in the cheeks or under-eye area
- Patients seeking lip or jawline enhancement
- Those wanting a non-surgical refresh of facial contours

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.
