A natural, charming addition to your smile

Dimple creation is a minimally invasive procedure that creates natural-looking cheek dimples, adding a distinctive charm to a patient's smile.

At Sculpt Aesthetics in Madhapur, Hyderabad, Dimple Creation is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Dimple Creation

Dimple creation surgery forms a small, controlled adhesion between the skin and underlying cheek muscle, creating an indentation that appears as a natural dimple when smiling.

Many people considering Dimple Creation have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals who desire dimples for aesthetic reasons
- Patients in good oral and general health

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Dimple Creation Works: Step by Step

Step 1: Consultation & Evaluation

You'll meet with your surgeon to discuss your goals, medical history, and concerns. This is the time to ask questions and understand whether Dimple Creation is right for you.

Step 2: Personalized Planning

Your surgeon examines your body structure and designs a plan for Dimple Creation that fits your anatomy, so results look natural and balanced.

Step 3: The Procedure

Dimple Creation is performed in a modern, sterile operation theatre under appropriate anesthesia, following strict safety protocols throughout.

Step 4: Recovery & Follow-Up

You're monitored closely after the procedure, with clear aftercare instructions and scheduled follow-up visits to track healing and results.

Our Approach

Performed through a tiny incision inside the mouth, the procedure creates a discreet, controlled connection beneath the skin that produces a natural dimple effect during facial expression, with no visible external scarring.

Benefits

Here's what patients typically gain from Dimple Creation:

- ✓ Natural-looking dimple effect
- ✓ Minimally invasive with no external scarring
- ✓ Quick outpatient procedure

Recovery Timeline

Recovery looks a little different for everyone, but here's a general idea of what to expect:

Most patients experience mild swelling for a few days and return to normal activities quickly.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

Pricing

The cost of Dimple Creation depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Scars & Marks

As the procedure is performed entirely from inside the mouth, there is no visible external scarring.

Safety & Things to Consider

Like any surgical procedure, this treatment carries general surgical risks, which your surgeon will explain in detail during consultation. At Sculpt Aesthetics, we follow international safety standards, strict infection-control protocols, and modern operation theatre facilities to keep every procedure as safe as possible. A thorough medical evaluation before surgery helps make sure the procedure is right for you.

Frequently Asked Questions

Is the procedure painful?

Most patients feel minimal discomfort during Dimple Creation itself, since it is performed under anesthesia. Some soreness in the days after is normal and manageable with prescribed medication.

How long does the surgery take?

This depends on the extent of the procedure and will be explained clearly during your consultation, once your specific plan is finalized.

When will I see the final results?

You'll notice initial changes as swelling reduces over the first few weeks, with final results becoming clearer over the following months.

Can I choose how deep the dimple looks?

Yes, the degree of depth can be discussed and customized with your surgeon, though the natural dimple effect only shows when smiling.

Is the dimple effect permanent?

Results are generally long-lasting, though in some cases the effect can soften slightly over time.
