Advanced regenerative skin and hair treatment

Exosome therapy is an advanced regenerative treatment used in skin and hair rejuvenation, harnessing cellular signaling to support renewal.

At Sculpt Aesthetics in Madhapur, Hyderabad, Exosomes Therapy is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Exosomes Therapy

Exosomes are tiny, nutrient-rich particles that carry regenerative signals between cells. When applied to skin or scalp, they can support collagen production, tissue repair, and follicle health.

Many people considering Exosomes Therapy have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals seeking advanced skin rejuvenation
- Patients pursuing non-surgical hair restoration support

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Exosomes Therapy Works: Step by Step

Step 1: Consultation & Skin/Health Assessment

Your provider reviews your goals and checks whether Exosomes Therapy suits your skin, hair, or health profile.

Step 2: Customized Plan

A treatment plan and, where relevant, a session schedule is created to match your specific needs.

Step 3: The Treatment

Exosomes Therapy is performed in a comfortable clinical setting, usually taking well under an hour.

Step 4: Aftercare & Follow-Up

You'll receive simple aftercare tips, and your provider will track your progress over follow-up visits or sessions.

Our Approach

Exosome solution is applied via micro-needling or injection to the treatment area, delivering regenerative signals to support skin and hair renewal.

Benefits

Here's what patients typically gain from Exosomes Therapy:

- ✓ Cutting-edge regenerative approach
- ✓ Supports skin renewal and hair health
- ✓ Minimal downtime, non-surgical

Additional Details You Should Know

What Makes Exosomes Different from PRP

While PRP uses platelets from your own blood, exosome therapy uses concentrated, lab-processed regenerative particles that can carry a higher density of growth signals, often used to enhance results alongside or after PRP/GFC sessions.

Pricing

The cost of Exosomes Therapy depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation.

(Editor note: replace this placeholder with confirmed price ranges once finalized.)

Safety & Things to Consider

This is a non-surgical treatment with minimal downtime and a good safety profile when performed by trained professionals using approved products. As with any injectable or energy-based treatment, mild, temporary side effects such as redness or swelling are possible and will be discussed during your consultation.

Frequently Asked Questions

How many sessions will I need?

This varies by individual and goal — your provider will recommend a session plan during your consultation.

How long do the results last?

Results vary depending on the treatment and individual factors like skin type and lifestyle; your provider can give you a realistic timeline.

Is exosome therapy safe?

Exosome products used in clinical settings are processed and screened for safety; your provider will explain the source and safety profile of the product used.

Can exosomes be combined with other hair or skin treatments?

Yes, it's often used alongside PRP, GFC, or micro-needling for enhanced results.
