Support natural hair growth and skin rejuvenation

GFC (Growth Factor Concentrate) therapy supports hair growth and skin rejuvenation using concentrated growth factors derived from the patient's own blood.

At Sculpt Aesthetics in Madhapur, Hyderabad, GFC Therapy is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding GFC Therapy

GFC therapy is a regenerative treatment that concentrates growth factors from the patient's blood, which are then applied to stimulate hair follicles or rejuvenate skin at a cellular level.

Many people considering GFC Therapy have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals experiencing early hair thinning
- Patients seeking skin rejuvenation without surgery

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How GFC Therapy Works: Step by Step

Step 1: Consultation & Skin/Health Assessment

Your provider reviews your goals and checks whether GFC Therapy suits your skin, hair, or health profile.

Step 2: Customized Plan

A treatment plan and, where relevant, a session schedule is created to match your specific needs.

Step 3: The Treatment

GFC Therapy is performed in a comfortable clinical setting, usually taking well under an hour.

Step 4: Aftercare & Follow-Up

You'll receive simple aftercare tips, and your provider will track your progress over follow-up visits or sessions.

Our Approach

A small blood sample is processed to isolate growth factors, which are then applied to the scalp or skin through micro-injections to stimulate natural regeneration.

Benefits

Here's what patients typically gain from GFC Therapy:

- ✓ Non-surgical, minimally invasive treatment
- ✓ Supports natural hair growth
- ✓ Improves overall skin quality

Recovery Timeline

Recovery looks a little different for everyone, but here's a general idea of what to expect:

Minimal downtime; most patients resume normal activities the same day.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

Pricing

The cost of GFC Therapy depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Safety & Things to Consider

This is a non-surgical treatment with minimal downtime and a good safety profile when performed by trained professionals using approved products. As with any injectable or energy-based treatment, mild, temporary side effects such as redness or swelling are possible and will be discussed during your consultation.

Frequently Asked Questions

How many sessions will I need?

This varies by individual and goal — your provider will recommend a session plan during your consultation.

How long do the results last?

Results vary depending on the treatment and individual factors like skin type and lifestyle; your provider can give you a realistic timeline.

How many GFC sessions are typically needed?

Most protocols involve a series of sessions spaced a few weeks apart; your provider will recommend a plan based on your hair or skin condition.

Is GFC therapy painful?

Most patients tolerate the micro-injections well, especially with topical numbing cream applied beforehand.
