Balanced, proportionate lips

Lip augmentation or reduction enhances or reduces lip volume to achieve better facial balance and proportion, tailored to each patient's facial features.

At Sculpt Aesthetics in Madhapur, Hyderabad, Lip Augmentation / Reduction is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Lip Augmentation / Reduction

Lip augmentation increases lip fullness and volume, while lip reduction decreases excess lip volume — both aimed at achieving lips that are proportionate to the rest of the face.

Many people considering Lip Augmentation / Reduction have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals seeking fuller, more defined lips
- Those with naturally larger lips seeking reduction

- Patients wanting improved facial balance and symmetry

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Lip Augmentation / Reduction Works: Step by Step

Step 1: Consultation & Evaluation

You'll meet with your surgeon to discuss your goals, medical history, and concerns. This is the time to ask questions and understand whether Lip Augmentation / Reduction is right for you.

Step 2: Personalized Planning

Your surgeon examines your body structure and designs a plan for Lip Augmentation / Reduction that fits your anatomy, so results look natural and balanced.

Step 3: The Procedure

Lip Augmentation / Reduction is performed in a modern, sterile operation theatre under appropriate anesthesia, following strict safety protocols throughout.

Step 4: Recovery & Follow-Up

You're monitored closely after the procedure, with clear aftercare instructions and scheduled follow-up visits to track healing and results.

Our Approach

Your surgeon evaluates facial proportions and lip structure to recommend the most suitable technique, whether augmentation (via fillers or surgical methods) or surgical reduction, for natural-looking balance.

Benefits

Here's what patients typically gain from Lip Augmentation / Reduction:

- ✓ Improved lip proportion and facial balance
- ✓ Natural-looking enhancement or refinement
- ✓ Customized to individual facial features

Pricing

The cost of Lip Augmentation / Reduction depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online.

Contact us at 9639635454 / 9133733733 for personalized, tentative pricing after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Scars & Marks

For surgical lip reduction, incisions are placed on the inner surface of the lip, keeping any scarring hidden from view.

Safety & Things to Consider

Like any surgical procedure, this treatment carries general surgical risks, which your surgeon will explain in detail during consultation. At Sculpt Aesthetics, we follow international safety standards, strict infection-control protocols, and modern operation theatre facilities to keep every procedure as safe as possible. A thorough medical evaluation before surgery helps make sure the procedure is right for you.

Frequently Asked Questions

Is the procedure painful?

Most patients feel minimal discomfort during Lip Augmentation / Reduction itself, since it is performed under anesthesia. Some soreness in the days after is normal and manageable with prescribed medication.

How long does the surgery take?

This depends on the extent of the procedure and will be explained clearly during your consultation, once your specific plan is finalized.

When will I see the final results?

You'll notice initial changes as swelling reduces over the first few weeks, with final results becoming clearer over the following months.

How long does lip filler last?

Lip fillers typically last 6-12 months, after which touch-ups can maintain your desired look.

Is surgical lip reduction permanent?

Yes, surgical lip reduction provides a long-term change compared to temporary filler-based

augmentation.
