Supervised, structured weight management

Our medical weight loss programs offer supervised, structured weight management solutions tailored to each patient's health profile and goals.

At Sculpt Aesthetics in Madhapur, Hyderabad, Medical Weight Loss Programs is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Medical Weight Loss Programs

Medical weight loss programs combine clinical evaluation, structured planning, and ongoing supervision to support sustainable, healthy weight management, distinct from unsupervised or fad approaches.

Many people considering Medical Weight Loss Programs have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals seeking a structured, medically supervised approach to weight loss
- Patients who have struggled with unsupervised methods

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Medical Weight Loss Programs Works: Step by Step

Step 1: Consultation & Skin/Health Assessment

Your provider reviews your goals and checks whether Medical Weight Loss Programs suits your skin, hair, or health profile.

Step 2: Customized Plan

A treatment plan and, where relevant, a session schedule is created to match your specific needs.

Step 3: The Treatment

Medical Weight Loss Programs is performed in a comfortable clinical setting, usually taking well under an hour.

Step 4: Aftercare & Follow-Up

You'll receive simple aftercare tips, and your provider will track your progress over follow-up visits or sessions.

Our Approach

Following a comprehensive health evaluation, a personalized plan is developed and monitored over time, adjusted as needed to support safe, effective progress.

Benefits

Here's what patients typically gain from Medical Weight Loss Programs:

- ✓ Medically supervised and personalized
- ✓ Structured, sustainable approach
- ✓ Ongoing monitoring and support

Additional Details You Should Know

Understanding BMI in Weight Management

Body Mass Index (BMI) is one of the key measures used to assess weight-related health risk and guide which weight-management approach — lifestyle-based, injectable-assisted, or surgical body contouring — may suit you best. Your program is designed around your individual BMI, health history, and goals.

Injectable Options & EMS Sculpt

For eligible patients, medically supervised weight-loss injectables (such as GLP-1 based options) may be included as part of a structured program under medical guidance. We also offer EMS Sculpt, a non-invasive muscle stimulation technology that can complement weight loss by toning and strengthening muscle in areas like the abdomen and glutes.

Pricing

The cost of Medical Weight Loss Programs depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online.

Contact us at 9639635454 / 9133733733 for personalized, tentative pricing after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Safety & Things to Consider

This is a non-surgical treatment with minimal downtime and a good safety profile when performed by trained professionals using approved products. As with any injectable or energy-based treatment, mild, temporary side effects such as redness or swelling are possible and will be discussed during your consultation.

Frequently Asked Questions

How many sessions will I need?

This varies by individual and goal — your provider will recommend a session plan during your consultation.

How long do the results last?

Results vary depending on the treatment and individual factors like skin type and lifestyle; your provider can give you a realistic timeline.

Is medication a mandatory part of the program?

No — medication is only recommended where medically appropriate after evaluation; many

patients follow structured lifestyle-based plans instead.

How is progress tracked during the program?

Regular follow-ups track weight, measurements, and overall health markers so your plan can be adjusted as needed.
