A customized combination of procedures to restore your pre-pregnancy confidence

A mommy makeover combines customized procedures designed to restore body confidence after pregnancy and childbirth, addressing changes to the breasts and abdomen in a single, coordinated plan.

At Sculpt Aesthetics in Madhapur, Hyderabad, Mommy Makeover is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Mommy Makeover

A mommy makeover is a personalized combination of surgical procedures — typically drawn from breast enhancement, breast lift, liposuction, and tummy tuck — tailored to address the specific changes each woman experiences after pregnancy.

Many people considering Mommy Makeover have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Women who have completed their family and are not planning further pregnancies
- Those with breast volume loss, sagging, or abdominal skin/muscle changes post-pregnancy
- Patients in good general health seeking comprehensive body restoration

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Mommy Makeover Works: Step by Step

Step 1: Consultation & Evaluation

You'll meet with your surgeon to discuss your goals, medical history, and concerns. This is the time to ask questions and understand whether Mommy Makeover is right for you.

Step 2: Personalized Planning

Your surgeon examines your body structure and designs a plan for Mommy Makeover that fits your anatomy, so results look natural and balanced.

Step 3: The Procedure

Mommy Makeover is performed in a modern, sterile operation theatre under appropriate anesthesia, following strict safety protocols throughout.

Step 4: Recovery & Follow-Up

You're monitored closely after the procedure, with clear aftercare instructions and scheduled follow-up visits to track healing and results.

Our Approach

During consultation, Dr. Suma Sandhyala evaluates each patient's concerns and combines procedures such as breast enhancement, breast lift, liposuction, and tummy tuck into a coordinated surgical plan for balanced, natural results.

Benefits

Here's what patients typically gain from Mommy Makeover:

- ✓ Comprehensive restoration in a coordinated plan
- ✓ Addresses both breast and abdominal changes

- ✓ Personalized to each woman's body and goals
- ✓ Renewed body confidence

Additional Details You Should Know

What's Typically Included

A mommy makeover is fully customized, but commonly combines two or more of the following: breast augmentation or lift to restore breast volume and position, a tummy tuck to tighten abdominal skin and muscle, and liposuction to refine body contour — all planned together for a cohesive, natural result.

Recovery Timeline

Recovery looks a little different for everyone, but here's a general idea of what to expect:

As this combines multiple procedures, recovery is individualized and discussed in detail during consultation, typically ranging from 2–6 weeks depending on the combination chosen.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

Pricing

The cost of Mommy Makeover depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation.

(Editor note: replace this placeholder with confirmed price ranges once finalized.)

Safety & Things to Consider

Like any surgical procedure, this treatment carries general surgical risks, which your surgeon will explain in detail during consultation. At Sculpt Aesthetics, we follow international safety standards, strict infection-control protocols, and modern operation theatre facilities to keep every procedure as safe as possible. A thorough medical evaluation before surgery helps make sure the procedure is right for you.

Frequently Asked Questions

Is the procedure painful?

Most patients feel minimal discomfort during Mommy Makeover itself, since it is performed under anesthesia. Some soreness in the days after is normal and manageable with prescribed medication.

How long does the surgery take?

This depends on the extent of the procedure and will be explained clearly during your consultation, once your specific plan is finalized.

When will I see the final results?

You'll notice initial changes as swelling reduces over the first few weeks, with final results becoming clearer over the following months.

Can all procedures be done in a single surgery?

Many patients combine procedures into one surgical session for convenience and a single recovery period, though your surgeon will confirm what's safe based on your health and the combination chosen.

When is the best time to have a mommy makeover?

Most surgeons recommend waiting until you've finished breastfeeding and your weight has stabilized for at least a few months, to get the most lasting results.
