Restore torn or stretched earlobes

Split earlobe repair restores torn or stretched earlobes, whether from injury, heavy earrings, or gauge stretching, with a quick, minor procedure. At Sculpt Aesthetics in Madhapur, Hyderabad, Split Earlobe Repair is performed by experienced plastic surgeons **Dr. Jagadish Kiran** and **Dr. Suma Sandhyala**, using modern techniques and a patient-first approach — so you always know what to expect, step by step.

Understanding Split Earlobe Repair

This procedure repairs a torn, split, or stretched earlobe by re-shaping and closing the affected tissue, restoring a natural earlobe contour that can, if desired, be re-pierced later.

Many people considering Split Earlobe Repair have questions or feel a little unsure about where to start — that's completely normal. Our team takes time during your first visit to explain things in plain language, so you can make a confident, informed decision at your own pace.

Signs You May Be a Good Candidate

You might be a good fit for this treatment if any of the following sound familiar:

- Individuals with a torn or split earlobe from injury or heavy earrings
- Those with stretched piercings (gauges) they wish to restore

The best way to know for sure is a one-on-one consultation, where your surgeon reviews your health history and goals in detail.

How Split Earlobe Repair Works: Step by Step

Step 1: Consultation & Diagnosis

Your surgeon examines the area and confirms whether Split Earlobe Repair is the right treatment for your specific situation.

Step 2: Preparing for the Procedure

You'll receive simple pre-procedure instructions, and the treatment area is prepared under sterile conditions.

Step 3: The Procedure

Split Earlobe Repair is usually completed quickly, often under local anesthesia, in a single outpatient visit.

Step 4: Aftercare

You'll get straightforward aftercare guidance to support quick, comfortable healing.

Our Approach

Under local anesthesia, the torn edges of the earlobe are trimmed and carefully re-joined to restore a smooth, natural contour with minimal, well-concealed scarring.

Benefits

Here's what patients typically gain from Split Earlobe Repair:

✓ Restored natural earlobe shape ✓ Minimal, well-hidden scarring ✓ Option to re-pierce after healing

Recovery Timeline

Recovery looks a little different for everyone, but here's a general idea of what to expect:

This is a quick outpatient procedure with healing typically complete within a few weeks.

Your surgeon will give you a personalized recovery plan, along with clear guidance on activity levels, medication, and follow-up visits, so healing stays on track.

Pricing

The cost of Split Earlobe Repair depends on factors like the technique used, extent of treatment, and your individual assessment — so we don't quote a fixed price online. **Contact us at 9639635454 / 9133733733 for personalized, tentative pricing** after a consultation. *(Editor note: replace this placeholder with confirmed price ranges once finalized.)*

Scars & Marks

The repair is designed to blend with the natural earlobe contour, and any resulting scar is typically very faint and easily concealed by hair or earrings.

Safety & Things to Consider

This is a minor procedure with a low overall risk profile when performed by an experienced surgeon under sterile conditions. Your surgeon will still walk you through the small risks involved, such as infection or scarring, so you know exactly what to expect.

Frequently Asked Questions

Will I need general anesthesia? Most minor procedures like this are done comfortably under local anesthesia, so you stay awake but feel no pain in the area.

Will there be a visible scar? Incisions are small and carefully placed to minimize visible scarring, and they typically fade well over time.

How soon can I get my ears re-pierced after repair? Most surgeons recommend waiting about 6-8 weeks for full healing before considering re-piercing.

Can both earlobes be repaired in one visit? Yes, both ears can usually be treated in the same short procedure.

Related Treatments You Might Consider
